

Technical Project Manager

About us

Centiel is a Swiss-based technology company that designs, manufactures, and delivers industry-leading power protection solutions for critical infrastructure. Our best-in-class, energy-efficient UPS systems ensure maximum availability and reliability, developed by the pioneers of the first transformerless UPS and the world's first modular three-phase UPS.

With a presence in over 80 countries, more than 90 partners, and nine subsidiaries worldwide, Centiel's rapidly expanding network provides first-class power protection solutions globally.

To support our growth and strengthen our team, we are now looking for a highly motivated Technical Project Manager to join our dynamic and innovative organisation.

Note: In line with our strategic growth, we are proactively collecting applications for this position as part of a forward-looking recruiting initiative. This means we are evaluating candidate profiles today to anticipate future hiring needs aligned with our development plans.

Who are we looking for

To support our growth and strengthen our Sales department, we are seeking a Technical Project Manager with a strong technical background, a structured approach, and a customer-first mindset. The ideal candidate will manage complex cross-functional projects from planning to delivery.

- Workplace: Cadro (Lugano), Switzerland
- Reporting to: Global Sales Director

Role purpose

The selected candidate will coordinate internal teams, external partners, and customers to ensure that technical projects are delivered on time, within scope and within budget.

You will serve as the primary point of contact for customers throughout the project lifecycle and contribute to the ongoing improvement of our project processes and service experience.

Key responsibilities

- Plan and manage multiple projects aligned with business goals
- Coordinate with Engineering, After Sales, and external suppliers
- Track milestones, mitigate risks, and resolve issues
- Communicate clearly with customers, internal teams, and stakeholders
- Support continuous improvement of project management tools and routines
- Ensure smooth project handover to After Sales

Qualifications & experience

- Bachelor's degree in Electrical or Electronic Engineering
- Minimum 2 years' experience in technical project management
- Strong leadership, communication, and coordination skills
- Proven experience working with cross-functional teams and external vendors
- Fluent in English (minimum B2 certified); German or other languages are a plus
- PMP or Scrum certification is a plus
- A background in construction or building services is appreciated

Skills & competencies

- Strong organisational, diagnostic, and planning skills
- Customer-oriented approach under pressure
- Effective multitasking and time management
- Ability to work autonomously with accountability
- Proactive mindset and ability to work in a dynamic environment

Company values

- Safety. Integrity. Respect. Team work
- Own it – act with urgency
- Foster a customer-first mindset

- Lead by example – drive continuous improvement
- Think big and execute

Expected results in the first 6–12 months

- Successfully manage and deliver at least two key technical projects
- Implement effective communication routines with stakeholders
- Enhance speed and quality in project execution, aligned with customer satisfaction

Contract details

- Permanent full-time contract (100%)
- Starting date: TBD

What we offer

- Competitive salary aligned with responsibilities
- High degree of autonomy and trust
- Inclusive and dynamic work environment
- Free parking, showers, and locker rooms
- Close to public transport and nature trails
- Support for work-life balance and wellbeing
